

MedVault Demo Protocol - Glycemic Control in Type 2 Diabetes

Protocol ID: MV-DEMO-2026-001 | Version 1.0 | Phase 2

Sponsor: Aurora Clinical Research (demo only)

Principal Investigator: Dr. Jane Chen, MD

Study contact: sponsor-demo@medvault.example | Tel: 555-010-2345

Sample patient chart ref (PHI demo): MRN-884422, John Doe, DOB 03/15/1978

1. Synopsis

Randomized, double-blind, placebo-controlled study evaluating encrypted eligibility matching via MedVault fhEVM on Ethereum Sepolia. Duration: 12 weeks screening + 24 weeks treatment.

2. Objectives

Primary: Change in HbA1c from baseline to week 24.

Secondary: Safety, quality-of-life, and sponsor incentive vault payout milestones.

3. Inclusion Criteria

Participants must meet ALL of the following:

- Age between 25 and 60 years at informed consent.
- Documented Type 2 diabetes mellitus for at least 6 months.
- HbA1c $\leq$ 8.5% at screening (central lab).
- Hemoglobin minimum 11.0 g/dL.
- Female participants only (non-pregnant, non-lactating).
- Height minimum 155 cm.
- Weight maximum 100 kg.
- Non-smokers only (no tobacco or nicotine in past 12 months).
- Normal blood pressure (systolic $<$ 140 mmHg and diastolic $<$ 90 mmHg) without adjustment of antihypertensive therapy within 30 days prior to screening.

4. Exclusion Criteria

- Type 1 diabetes or secondary diabetes.
- Hemoglobin $<$ 11.0 g/dL or active bleeding disorder.
- Current smoker or vaping within 12 months.
- Uncontrolled hypertension.

5. Study Sites

Remote-first enrollment with optional site visits in Boston, MA and Austin, TX.

6. Compensation

Participants receive confidential ETH micro-payments via MedVault Sponsor Incentive Vault upon milestone completion (screening, week 12, week 24).

7. Regulatory

Demo document only - not for human subjects. For MedVault sponsor UI and AI criteria extraction testing.
